

### production

The manufacturing area is designed for production of 10 ml - 30 ml glass and plastic containers. The filling and packaging line is equipped with automatic 100% filling volume control and IPC camera control systems for process monitoring. If required, all packages can be serialised according to the EU-Anti Counterfeiting Directive and closed with tamper evident seals.

taylormade products

flexible batch volumes

clinical trial medication

repackaging & serialisation

### development

MoNo is specialised in development of liquid formulations. We offer a broad range of container-closure systems for sterile and non-sterile solutions in multidose systems. Our core competences in aseptic production are nasal sprays, throat sprays and eye drops.

fields of application:

nose / eyes / throat / others

### quality control

Medicinal products, medical devices and food supplements are subject to scrutiny by our quality control before release to the market. This control is an integral part of quality management, designed to optimise process and product quality. Our fully equipped laboratory provides services from release of raw materials, method development and stability programs to batch release.

certifications:  
EU-GMP, ISO 13485, EU-MDR

### regulatory services

licensing / dossier / maintenance / registration

In our regulatory services department experienced employees are responsible for the compliance of medicinal products, medical devices and food supplements during their complete life cycle. Our regulatory experts support you from the early stage of dossier creation to pharmacovigilance and post market surveillance.

### logistics & distribution

We maintain compliance of our own products in 55 countries within the European Union and worldwide. No matter if you're already present on the Austrian market - you can always realise your warehousing and pre-wholesale with us!

The sister companies MoNo & Sigmapharm offer a complete range of services in all of these fields. For further information please **contact us:**
